Aalborg Universitet  
2021-2022

### Mercantec

Grundforløbet 2  
2024-2024

## COMPETENCES

- Drivers License B
- Danish
- English
- C, Go/Golang. C++

# Andreas Christoffersen

Computer Technician -  
Programming

## PROFILE

My interest for programming, and general IT, came from me starting at an early age playing video games. My first game was Toy Story 2 for the PlayStation 1. Ever since then, i have had an interest around video games and general IT and how they work behind the screen.

In my free time, i like to play video games, either alone or with the boys, watch a good movie, read a book, cycle, train and of course do some programming by my own accord.

If you are interested in learning more about me and my capabilities, you can visit my LinkedIn page and my GitHub page, under "independent-works-or-art" and "LeetCode-Tasks"! See you around for a good further discussion!

## UNIVERSITIES COMPETENCES

- Experience with teamwork, with multiple groups
- Ease of use for the user
- Design Principles
- Test of prototype and product

## WORK

Unfortunately i have no prior experience with work, but that does not scare me. I am ready to get out there in the real world and learn more about it.
